PROJECTS

Personal Expense Tracking Dashboard (*React JS, JavaScript, Chart.js, HTML, CSS*)

- Developed a React-based expense tracking application to record and categorize daily expenses.
- Implemented interactive charts using Chart.js to visualize spending patterns.
- Utilized React Hooks (`useState`, `useEffect`) for efficient state management.
- Integrated local storage to persist user data across sessions.
- Designed a responsive UI for seamless usage across devices.

Movie Discovery & Recommendation Platform (*React JS, JavaScript, REST API, HTML, CSS*)

- Built a movie discovery application to display trending and searched movies.
- Integrated third-party REST APIs to fetch real-time movie data.
- Implemented search and filtering features for improved user experience.
- Followed component-based architecture for reusable and maintainable code.
- Optimized state updates to improve application performance.
